

Grass & Buffer Feeding Meeting

What is Mech-fiber®?

Mech-fiber® is a patented ration presentation produced exclusively in the Keenan MF mixer wagon. This has been scientifically proven to produce a more stable rumen that results in an improvement of the overall digestibility of the ration.

It's produced through a combination of processes developed by Keenan and engineered into all Mech-fiber® mixer wagons.

Colm McEvoy will give a short presentation on the following;

- Mech Fiber® Buffer Feed Mix
- Benefits of Buffer Feeding at Grass
- Management of Buffer Feeding

Farm Demo: Wednesday 6th of July
Farm: Kilycrony Farm, Knockbridge, Dundalk, Louth
Event will be signposted from main roads
Time: 2.00pm start

Working Demo of MF340 Mixer Wagon and Pace®
